Couch.io/
One/
base

Friday, January 25, 13
- Jan
- CouchDB since 2006
- Couchio/CouchOne/Couchbase
- Couchbase until a week ago

Next: - elephant in the room
CouchDB Isn’t Dead

- elephant in the room
- sauce/canonical
- blog post
- activity down
- Couchbase confusion

Next: 2012 pros
- 1.2.0
- new website
- summer break
- definition of insanity: doing the same thing and expecting a different result
- > LOTS of changes

Next: Reboot
CouchDB

REBOOT

CouchDB Reboot
- Mission Statement *cough*
- More, faster, better releases
- QA
- Docs [show]
- Teams
- focus on getting contributions
- Team meetings (in person and weekly status)
- long list of todos
Conflicts are the rule, not the exception
Improve and simplify the user and security model

Friday, January 25, 13
Remove reserved metadata from documents
built-in map / reduce / filter / update etc. functions
DSL for index creation, validation functions, etc.
Support CORS
WebSockets
EventSource
Richer querying model
Partial reads & updates of documents
Enhance background task management
Documentation
Global changes feed
_changes feed
for views

Friday, January 25, 13
per-db overrides of server-wide settings
etc. etc. etc.
